

1 Stored trajectory

USER find order A
ASSISTANT call lookup
TOOL confirmation = X7Q
ASSISTANT VALUE=X7Q

2 Render + mask

system / user / tool: . . .
assistant tool call:
assistant answer:

■ = supervised token

3 Length handling

A split can place the target
and its tool result in different
attention groups.

4 Post-render audit

Target still labeled: YES
Verified source reachable: NO
→ unsupported supervision

Boundary-breaking view

user + call

tool: X7Q

split

target: VALUE=X7Q

Grouped closure

minimal structure + tool: X7Q + complete target: VALUE=X7Q

valid
